CAREER SUMMARY

Accomplished Technical Lead and Senior Software Engineer with **14+ years of experience** architecting, designing, and delivering enterprise-grade distributed systems across healthcare, aviation, retail, and fintech domains. Proven track record of leading cross-functional teams of up to 20 engineers, driving strategic architectural decisions, and delivering high-impact solutions at scale within Agile/DevSecOps environments.

- Expertise in **Full Stack Java/JEE** development with a strong focus on **Microservices Architecture**, Spring Boot, REST APIs, and cloud-native solutions on **Azure, AWS, and PCF**.
- Architected and delivered **Active-Active and Active-Passive Disaster Recovery** solutions for mission-critical enterprise distributed systems, ensuring high availability and business continuity.
- Deep proficiency in **cloud technologies** (Azure App Services, Event Hub, Cosmos DB, App Insights; AWS ECS Fargate, ElastiCache, SQS, S3, CloudWatch, ALB) and container orchestration with **Kubernetes and Docker**.
- Experienced in end-to-end **API security**, RBAC access controls, OAuth integrations, and DevSecOps practices including Sonar, Checkmarx, and Whitesource.
- Demonstrated ability to operate across multiple strategic roles: **Technical Lead, Pod Lead, Cloud Migration Engineer, Full Stack Developer, and Architect** — consistently delivering above expectations.
- Passionate about **mentoring engineering talent**, defining coding/design standards, driving POCs, and contributing to innovation challenges and hackathons with multiple first-place finishes.

TECHNICAL SKILLS

Languages & Frameworks	Core Java 8+, Spring Boot 2+, Spring 5+, Node.js 8+, TypeScript
Architecture	Microservices, REST Web Services, Distributed Systems, Active-Active/Passive DR
Cloud Platforms	AWS (ECS Fargate, ElastiCache, SQS, S3, CloudWatch, ALB, Secrets Manager) Azure (App Services, Event Hub, Key Vault, App Insights, Cosmos DB), PCF
Messaging & Streaming	Apache Kafka (Azure Event Hub & Kubernetes-deployed clusters), RabbitMQ, JMS, SQS
Databases	PostgreSQL, SQL, Couchbase, MongoDB, Cosmos DB, Redis, Oracle DB
DevOps & Containers	Docker, Kubernetes, Jenkins, Maven, CI/CD, Shell Scripting, Unix
Frontend	Angular 6/7, AngularJS, Bootstrap 4, JavaScript
Monitoring	Splunk, Grafana, Dynatrace, Spotlight, Lenses (Kafka)
Methodologies	Agile / Scrum, DevSecOps, SDLC

WORK EXPERIENCE

Tesco Technology, Bangalore

Oct 2023 – Oct 2024

SDE 3 – Product API

Technologies: Spring Boot, Java, Microservices, Apache Kafka, Couchbase DB, Kubernetes, Docker, Azure

- Led end-to-end design, development, and deployment of critical API features for Tesco's Product API platform serving millions of customers.
- Drove architectural decisions on application design, infrastructure provisioning, and NFR (performance, scalability, cost) optimisation.

- Conducted POC activities to evaluate emerging technologies and frameworks, directly influencing platform roadmap decisions.
- Mentored and guided junior engineers, establishing engineering best practices across the team.
- Collaborated with business stakeholders to define and deliver business-critical features with the highest quality standards.
- Active participant in cross-functional SDE 3 guilds, contributing innovative solutions to common engineering problems across Tesco's technology organisation.
- Played a key role in recruitment, identifying and onboarding top engineering talent.

Walmart Global Technology, Bangalore

Jul 2020 – Mar 2023

Technical Lead – Financial Data Services

Technologies: Spring Boot, Java, Microservices, Apache Kafka, Cosmos DB, Kubernetes, Azure

- Led a team of 20 engineers across multiple pods, responsible for the architecture, design, and delivery of Walmart's Financial Data Services platform.
- Architected distributed system components including Active-Active and Active-Passive disaster recovery frameworks for enterprise-scale applications.
- Drove design reviews, code quality standards, and security governance across all owned components, including API security, RBAC, and access controls.
- Analysed and optimised resource costs across server, database, and infrastructure components, reducing operational expenditure.
- Worked n-2 sprints ahead on complex business problems, performing spikes and POCs to identify optimal technical solutions.
- Mentored junior engineers and actively contributed to Walmart's Architect's Forum, standardising architectures and technical best practices organisation-wide.
- Contributed as a stretch activity to Walmart's internal ETL cloud platform using Apache Spark, Apache Beam, and Airflow.
- Selected among top 10 projects in Walmart Hackathon for Smart Notification Engine; won 1st place in Elite Hackathon for API Developer Portal.

GE Aviation, Bangalore

Jun 2018 – Jun 2020

Technical Lead / Pod Lead / Full Stack Developer

Technologies: TypeScript, Node.js, Angular 7, Spring Boot, PCF, Postgres, Redis, RabbitMQ, AWS ECS, Fargate, S3, Docker

- Designed and developed a User Management Access framework for a product suite with 5 product lines, integrating OAuth (PingFed & Predix UAA) and building 4 TypeScript microservices with Angular 7 UI.
- Led full stack development of Material Optimizer, an enterprise Inventory Management System, owning major architectural decisions, CI/CD pipelines, and security compliance (Sonar, Checkmarx, Whitesource).
- Spearheaded DMRO Cloud Migration, making 45+ microservices cloud-agnostic and migrating from PCF to AWS (ECS Fargate, S3, Lambda, RDS).
- Served as Team Lead for DMRO XP/Cross Pod, managing horizontal microservices used across all 5 teams, driving tech upgrades (Angular & Spring version migrations), and setting cross-team coding standards.
- Awarded 'Inspire and Empower' recognition for going above and beyond and performing multiple roles simultaneously.

GE Healthcare, Bangalore

Mar 2012 – May 2018

Individual Contributor / Senior Developer / Scrum Master

Technologies: Spring Boot, Spring 4, Core Java, REST, AngularJS, IOT (Axeda), AWS EC2, JMS, Hibernate

- Contributed to Remote Connectivity Services — a common connectivity platform for medical devices enabling remote services, updates, and troubleshooting — covering GDPR compliance and cloud migration to AWS.
- Developed Secure Service Access infrastructure, enabling service engineers to securely access medical device tools and collect performance data.
- Served as Scrum Master, driving Agile ceremonies and cross-team collaboration across projects.
- Won 5th place in GE Healthcare's Innovation Challenge — Next Gen Healthcare Services.

Infosys Limited, Bangalore

Jan 2010 – Feb 2012

Individual Contributor

Technologies: Core Java, Jasper ETL, Oracle DB, Eclipse IDE SDK, DLTK, Unix, Shell Scripting

- Developed Finacle ETL — a data extraction tool increasing efficiency of job development through a graphical environment.
- Built Finacle Scripting Studio (FSS), an Eclipse-based IDE for creating Finacle scripts using DLTK technology.
- Completed Infosys's 6-month intensive technical training covering Java, Unix, SQL, and PSQL.

EDUCATION

Qualification	Institution	Year
Bachelor of Engineering (E&C;)	KLE College of Engineering & Technology, VTU, Belgaum	2005 – 2009
PUC (1st & 2nd Year)	Gogte College of Science, Belgaum	2003 – 2005
SSLC (10th Standard)	Presentation Girls High School, Dharwad	2003

CERTIFICATIONS & ACHIEVEMENTS

- **Core Spring 4.0** Certification
- **GE CrotonVille** – Foundation of Leadership
- **GE CrotonVille** – Dialogue to Decision
- ■ **1st Place** – GE-level Hackathon
- ■ **1st Place** – Elite Hackathon (API Developer Portal using open-source tech stack)
- ■ **Top 10** – Walmart Hackathon (Smart Notification Engine project)
- ■■ **5th Place** – GE Healthcare Innovation Challenge (Next Gen Healthcare Services)
- ■ **'Inspire and Empower'** Award at GE Aviation — recognised for performing multiple roles and going above and beyond

OTHER CONTRIBUTIONS

- **Production Troubleshooting & Performance Improvement:** Actively led Root Cause Analysis of production issues, implementing solutions to improve performance and reduce downtime.
- **Team Energiser & Engagement Lead:** Planned and organised team events throughout the year; recognised for demonstrating inclusiveness and meticulous event planning.
- **Recruitment:** Actively participated in company hiring, helping identify and evaluate top engineering candidates.
- **Walmart Cloud Platform Contribution:** Contributed as a stretch activity to Walmart's in-house ETL cloud platform leveraging Apache Spark, Apache Beam, and Airflow.
- **Architect's Forum:** Active member and contributor of Walmart's Architect's Forum, standardising architectures and technical best practices organisation-wide.

I hereby declare that the above information is true and correct to the best of my knowledge.
